WE'RE LOOKING FOR YOU!

tracekey

Our mission:

In order to counteract the global risk of counterfeit drugs the EU will require each individual drug to be labelled and tracked with an individual serial number, beginning from February 2019.

With the tracekey cloud platform we offer pharmaceutical companies a big data solution for tracking drugs to create transparency in the supply chain.
For manufacturers and authorities. For consumers and patients.
And you can help us to achieve that as

Software Engineer (f/m)

Your duties:
- Software Development and Design
- Testing and quality assurance
- build and deployment support

Your profile:
- You are a student or graduate of a computer science-related department or have a similar qualification; work experience is a plus
- You love to program in Java (better still: Java EE)
- You find your way around the Linux shell
- You are a team player (maybe you even know DevOps/Scrum)

We would consider it as a plus, if you have knowledge about:
- Spring, Hibernate, Vaadin, Ansible
- Source Code Management and Issue Tracking (Git/Jira)
- Test automation (Selenium, BDFramework)
- Continous Integration (Jenkins, Bamboo), Big Data (Hadoop,HBase)

What we offer:
- You work in a motivated team and can take on responsibility early on
- You become part of a company in which you can fully contribute your creativity to the company's success.
- You contribute to the digitization of an entire industry and make the world a little safer

So what are you waiting for? Apply by e-mail to sandra.klein@tracekey.com
Do you have any more questions? +49 234 54003-30 (Sandra Klein)

We are looking forward to hear from you!
