WE'RE LOOKING FOR YOU!

tracekey

Our mission:

In order to counteract the global risk of counterfeit drugs the EU will require each individual drug to be labelled and tracked with an individual serial number, beginning from February 2019.

With the tracekey cloud platform we offer pharmaceutical companies a big data solution for tracking drugs to create transparency in the supply chain.
For manufacturers and authorities. For consumers and patients.
And you can help us to achieve that as

System Administrator (f/m/x)

Your duties:
- Administration of our local and cloud-based server infrastructure (Linux, Vm-ware, ESXi, Windows Server), workstation systems (MacOS, Windows 10, Ubuntu), network infrastructure and our business applications (Atlassian products, MS Office365, etc.)
- Monitoring and maintenance of data backup and system monitoring
- System deployment (Ansible, Vagrant, Powershell, Saltstack)
- Cooperation with software development
- Documentation of infrastructure and IT processes

Your profile:
- You are an IT specialist for system integration, graduate of an IT-related field, have a similar qualification or are a career changer.
- You have at least two years of professional experience and work in a service-oriented manner
- You have intensive experience in the administration of the common desktop and server operating systems (Windows, Linux, MacOS) and the shell is not only a petrol station for you.

What we offer:
- You work in a motivated team and can take on responsibility early on
- You become part of a company in which you can fully contribute your creativity to the company's success.
- You contribute to the digitization of an entire industry and make the world a little safer

So what are you waiting for? Apply by e-mail to sandra.klein@tracekey.com
Do you have any more questions? +49 234 54003-30 (Sandra Klein)

We are looking forward to hear from you!
