Be part of our SCRUM team

tracekey solutions

We connect manufacturers, contract manufacturers, logistics, and authorities - with our innovative software products, we offer smart serialization and track&trace solutions that fit our customers exactly: We currently support small and medium-sized pharmaceutical companies in particular, which are spread **across Europe and Asia.**

You are just the right person for our SCRUM team, if you

- have experience in Java programming and are familiar with frameworks such as Spring, Hibernate, and Vaadin,
- enjoy topics like Big Data and Cloud technologies,
- additionally, have experience in test automation,
- as a plus, have experience with Linux, Azure, Ansible, Hadoop/HBase, Jenkins, Selenium
- like to work in a team, but independently as well,
- and last but not least, are confident in English (spoken + written).

Your tasks
- You will be fully involved in all phases of product development - from design to implementation, to quality assurance.
- You will support the build and deployment process.
- You bear responsibility because your results have a direct influence on the next version of our software.

Look forward to…

… a birthday serenade from the entire company, flexible working hours, and an agile, international team, fresh fruit and vegetables every day, flat-rate drinks, and joint activities such as barbecues, breakfast, sports, and much more.
During Covid-19 we work in the Mobile Office: remote teamwork, digital team events…

Personal initiative is important to us - We´re looking forward to receiving your personal application!
